WELCOME, CROESSO. Thank you for your time.

The concept of writing was born from a natural realisation ancient humans arrived at in the past in that we forget things. Life is like a giant weather program, it's calm, deadly silent one moment. Then... BOOM!!! everything is happening all at once. Eventually when that particular storm we are faced with at that given moment begins to run out of fluid, it gradually reduces its bite. It's mark left behind for those that dare observe.

Remember that every storm eventually runs out of rain.

Ancient humans cultivated writing like they ploughed the soil, or threw the first projectiles and insults. It was, and still is an ongoing field. As they became more cunning, more sophisticated and creative another essential spark was lit. Humans and others alike can manipulate the perceived environment and make it work for, not against. You can encapsulate a staggering amount of data into such a small thing. The modern world emphasizes this into a magnitude that many, particularly our beloved elders, know and have to wrestle with all too well.

Generations apart, yet you know that feeling of holding another's hand. Sometimes they are holding on to you, and sometimes you are holding on to them. Dearly.

Another shattering concept humans have to grapple with constantly...

The

FUTURE

It is there and it is as real as these words, but you can't see it, we can only pay attention when it is trying to warn us. Like a lightning bolt or a howl in the darkness, it shakes us to the core of our upmost and downmost being and sheds a light on what we are missing, what we have lost, what we should be, what we always seem to be searching for and losing... Ourselves and each other.

Dont hold on too tight, the lungs need space to do their part. Breathe, open your eYes and in turn, maybe you'll be able to plot your course and enjoy the life you were meant to have. Maybe.

The spaces in between are your canvas dear reader. I encourage you to put yourself back in the classroom of life and pick up the tools nature bestowed in you. **CREATE**, get out of your sea, lake, river, stream, tree or cave... or pit, and see what there is to be done.

STAY
D&M
X

The first letter in the English ALPHABET represented **is** the capstone that is missing from the pyramids in Egypt.

Encoded into the structural dimensions, placement and astrological alignment showcase the greatest achievements of the Nile Delta civilization. Furthermore this culture had mastered chemistry and this was one of their most prized, **secret** and ancient arts.

The **symbol** for sulphur represented as the triangle and cross which **is** the side and ariel view of the Great Pyramid at GIZA. The pyramids were producing chemicals on an industrial **scale** for the production of Ammonia Sulphate as fertilizer, and Hydrochloric acid for metalurgy, water treatment and others.

The Great Pyramid specifically was producing Sulphuric acid by combining molten Mercury Sulphide, Methane, AIR and water.

BRAVO
Two Circles/Cells
Doubling/Creation/Well Done!

The second letter of the English alphabet drawn **is** two joined circles which represents a doubling/duplicating effect or process**s**.

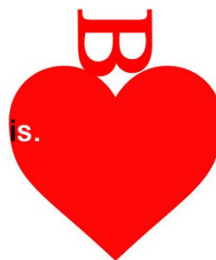

When we say the word Bravo! it's a celebration, much like creation itself. Also the idea of creation implies it takes**s** two to make one as in Male & Female.

If we take the **s**imple two letter word AB for an example:

ALPHA - Peak/Up-Most High/Exalted

BRAVO - Doubling/Creation/Well Done!

It reads as an exalted celebration or the greatest**s**t achievement.

Which creation truly **is**.

The third letter in the English alphabet represented **is** the crescent Moon. Just like the Sun, our beloved Moon has always captivated our imagination and bringing a much needed relief for those in times of total darkness.

It's peculiar cyclic pattern that governs the rising tide, the fact it keeps the same face towards our planet Earth. But more interesting is how it seems to disappear and re-appear, changing it's shape, building into a full circle to then reduce again. It **is** also associated with Silver and liquid Mercury in it's ability to transform.

The ancient Egyptians linked it with the horns of their sacred cattle and similar principles explained, therefore it became the emblem of the goddess **Isis**/Hathor. The great mother that kept her child Horus nourished, hidden and protected.

The © shape therefore represents concealment and something a kin to magic

DELTA

Body of Water

Womb/Birth/Container/Planet Earth

The fourth letter in the English alphabet represented **is** a container of water, a vessel, a cup and also a stylized pregnant woman.

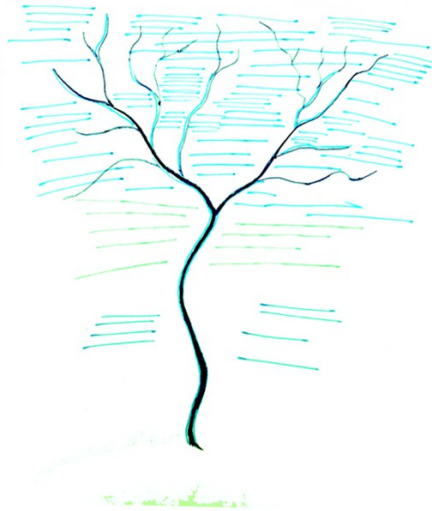

WOMB

It gives **s** the name to the area of landform at the mouth of a river. It is the fundamental basis for all major past and present civilizations' ability to **s**urvive and thrive. All major industry and trade is done via the sea and rivers.

It is a vital necessity to create and sustain life.

The great healer.

1.2.3.EE333

ECHO
Ladder/Steps
Mirrored/Repeating/Sequence

The fifth letter in the English alphabet shown is a stylized ladder or steps. This gives us the concept of repetition, to progress, continuation like an echo of sound.

There **is** a CALL and an ANSWER 

In a church it creates a feeling of awe and ascension, as the notes repeat and reflect from the stone walls and glass they **s**well into a greater, wider expanse and we cannot help but be MOVED by it.

Not surprising then the five pointed star shown below **is** the established emblem of **s**pace, the stars, the heavens. The Duat. All in fixed sequence, their light reflected for eternity.

FOXT ROT
Foxing/Fire
To Burn/Reduce/Decay/Hunt

The **s**ixth letter in the English alphabet represented **i**s a stylized jumping Fox. Wild and possessing a sometimes deadly personality. With it's teeth exposed, growling and frothing, it's no wonder the ancient desert Fire Fox was so feared and hunted in Egypt.

Symbolically and shamefully it still is today.

Named after his dwelling place, this **i**s **S**et. He would howl in the evening signalling darkness was to come. The scavenger that stalked the night-time desert feeding on whatever and whoever was available. Part of the wider family of desert predators like the Hawk, he is joined to Horus **s** hence why he is slated as his evil, jealous uncle. DARKNESS can only be overcome by confrontation and

UNDER**S**TANDING

His colour and demeanor a kin to fire, raging, consuming. Hell.

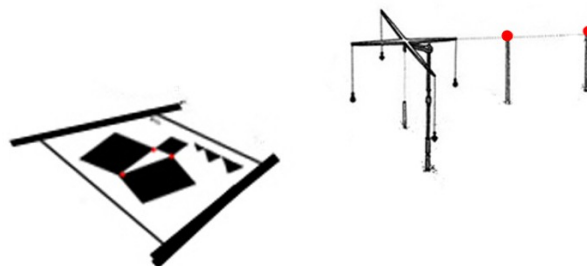

The seventh letter represented is a directional curve, the shape of **Osiris** sitting down holding the Ankh, the key of life. The Ankh holds many concepts, one is of divine thought or consciousness.

To Think, to anchor a thought and conceive a plan then chart a course to that destination. Like golf and most games and processes in nature there is a beginning and an end, then the cycle begins again. Re-newed. Like the Sun rising, setting then returning.

The above right shows the plan of an ancient Egyptian house or temple. Below shown is the ancient measuring tool known as the GROMA used by architects and surveyors to define a given distance.

What goes around, comes around.

HOTEL
Arch/Entrance
Temple/Place of Nourishment

The eighth letter in the English alphabet shown is **is** an Egyptian archway/entrance to the **s**acred temple. The body and mind **is** indeed like a temple.

That place all living things hold so close to their heart.
A place where we can leave and return to, relax,
nouri**sh** ourselves and most important to sleep.

If we look at the word HOME

HOTEL - Temple/Place of Nourishment
OSCAR - Creator/Destroyer/Life Force
MIKE - Protection/Hunter/Provider/Teacher
ECHO - Sequence/Repeating/Mirrored

Home **is** a continuous life-giving, motherly, protective place. A home should reflect the person/thing that dwells there but you must leave it, or it can harm instead of protecting. If it's taken care of, it will take care of you and will **s**tand the test of time.

So look after your hotel, and it will look after you.

The ninth letter of the English alphabet represented **is** a singular pylon/obelisk. The highest number value in the gematric **s**ystem.

Indigo/Tyrian Purple has long been a colour of royalty. Expensive initially due to the pigment deriving from sea snails which had to be crushed en-masse to achieve the desired depth of colour.

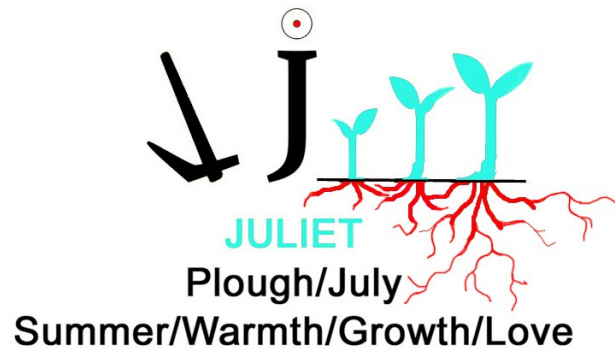

The Egyptian pylon is a symbol of high intellect, erected in honour of the Pharaoh/State/Priesthood for it's **s**upreme achievements and can be found all across the world. When stood at the foot of one, gazing upward, it **is** a sight to BEHOLD

Like the tip of a pen, or indeed a pyramid It points upward to the heavens, to the Sun & Moon which have long been established as **s**ymbols of

WISDOM

An ancient Sun/Moon-dial.

The tenth letter in the English alphabet represented **is** a stylized plough.

Ploughing in the fields at the beginning and during the dry **s**easons in preparation for the seed to be planted and sowed to receive the necessary component to produce crops that **s**ustain civilizations.

WHEAT

The **s**eed cried "O Romeo, Romeo where art thou?"

And so he ran down from the heavens as Sunrain to meet her.

It **is** said people are like complicated house plants**s**. We just need a little Sun and H₂O now and then and we are good to go.

The eleventh letter of the English Alphabet represented **is** the **s**hape of a vulture with outstretched wings.

Like other desert predators the ancient Egyptians held the vulture in high regard. Like Horus the falcon, circling above **s**tudying and watching it's prey. Waiting for the precise moment to **s**trike and using it's own weight with it's large deadly talons pinning down it's exhausted, almost dead opponent and tearing it to pieces.

It's no **s**urprise the Egyptians chose it to become one of their emblems of war.

KILO - Weight/Weighed Down

INDIA - Purple/Royalty/High Intelligence

LIMA - Lime/Acid/Stealth/Precision

OSCAR - Creator/Destroyer/Life Force

A large/heavy, fiery, stealthy intelligence indeed.

The twelfth letter of the English alphabet shown **is** a rearing Cobra ready to strike it's target.

Shedding it's green **skin**, seemingly immortal. Slithering below, and above, perfectly camouflaged, cunning and with a vicious bite coupled with deadly poison to boot. It's no wonder why it **is** revered in most cultures as the ultimate hunter. In defence all  **hiss** to mimic it's voice as means of protection.

The Snake in the garden really did make the first humans conscious**s**. It can take down a Lion in a single sweep. It taught us to pay attention, to be vigilant and has troubled our minds and dreams**s** ever since we laid eyes on it.

Out of FEAT it forced our ancient ancestors out of the waters, trees and caves and called **us** to adventure.

Another symbol of a supreme intelligence which adorned the  crown of the Pharaohs.

The thirteenth letter of the English alphabet shown **is** a stylized owl face, ears or its beak.

MAMA CITA

The Barn Owl in particular **is** an outstanding bird of prey. With its **s**uperior vision and the ability to rotate it's head to 270 degrees, it flies through the air without a sound to swiftly catch it's prey. It makes a fine example of the primordial force a mother can BE

We learn so much from our mother tongue, we are all brought into this world through her and she will do absolutely anything to protect her children. Bestowing in us the neces**s**ary ingredien**t**s to survive in this sometimes seemingly cruel world.

She shows us to face what we must head on no matter what and become who we are meant to BE

We are truly lost without HER

The fourteenth letter of the English alphabet representing A lightning bolt striking twice. November being the eleventh month, a time when the winter **is** drawing in and coldness creeps at the door. A mighty force of nature that can cause all manner of unwanted **s**cenarios.

Eleven, 11 can be **S**EEN above as two knives, sharp and deadly like lightning. A consi**s**tent reminder that nature sometimes is to be feared and respected.

It **is** said that first to create, one must first destroy. Like a sculptor hacking away at the **s**tone, obliterating it's exterior facade to then create and reveal something more refined.

Nature's **SWORD**, and like all processes in nature, this cycle repeats again and again. It is evolution at it's most destructive.

The Sun Creator/Destroyer/Life Force

The fifteenth letter in the English alphabet de-picted **is** our glorious**s** shining Sun who rises everyday to bring us light, warmth and energy.

It has long been a symbol of ILLUMINATION also. Like light of the mind itself we would be helples**s** without it. It **is** our **s**overeign benefactor that has always shown us the WAY Animating our reality and from its fixed centre point in our solar system it gently pulls the strings.

It also has a destructive and sometimes catastrophic effect too.

So thank the SUN for ris**ing** up in the morning and bringing you to

LIFE

PAPA
Father
Leader/Guide/Instructor/Protector

The sixteenth letter in the English alphabet shown is a male figure with one hand on his hip to symbolize authority and leadership. Like the Sun, our great father makes great sacrifices for his family. He is a fire that never goes out, he is the banner, the flag, the great instructor. Firm, but fair and teaches us a different kind of love and strength.

His burden is his promise to protect the family unit and a kin to our great mother, to always be there in times of

NEE **d**

PAPA - Father/Guide/Instructor

ALPHA - Peak/Up-Most High/Exalted

PAPA - Father/Guide/Instructor

ALPHA - Peak/Up-Most High/Exalted

The duplicate effect similar to Welsh/Cymraeg and the Hieroglyphics only cements further a great leader's importance in our world.

To Question/Recieve/Question

The seventeenth letter in the English alphabet shown above is the Egyptian icon of the Sun & Snake. Both seperately convey intellect. Combined amplifies it's supremacy.

It is adourned above arches in ancient temples and colleges and it was in these institutions the students gained and developed their most valuable tool set.

Therefore it **is** the emblem of LEARNING itself.

To learn we must **ask** questions and in return, answers beckon, which often leads **s** to more questions.

Learning is a constant endeavour and there is much to learn and **share**.

It is said there are no right answers, just better questions?

ROMEO
The Eye
Light/**V**ision/Focus/Perception

The eighteenth letter in the English alphabet **is** the simplified Egyptian eye of **R**a/Re/Ro. The rays **s** of light from the Sun. Our eyes are our most valuable possession, without we are literally blind.

This simple concept of vision, the process of light travelling from our big star across the vastness of space allowing us to witness and discern our surroundings.

The other EYE is our minds EYE with it's special trinity of components, the third 'hidden' eye is where our most deepest inner workings **s** are conceived and developed.

With our eyes working together in perfect uni**s**on is to see things properly and therefore to think properly. To think is to allow and bring forth the neccess**a**ry actions to follow and observe the outcome.

Beauty, or the beast, is in the eye of the beholde**R**

Snake Tongue Red/Venom/Poison/Medicine/Fire

The nineteenth letter in the English alphabet shown **is** the Snake's final warning before it unleashes it's deadly arsenal. Animals are primed to respond to the colour

In our quest to understand, like our ancient ancestors we have **s**tudied all the natural predators of this world, from the mammal to the botanical to see what exactly it is they possess **s** and the potential benefits they can bring into our lives.

Like fire, medicine has to be one of the finest endeavors humans have managed to **ma**ster, almost. We realised it's not just predators that can harm us, the world is awry with potential dangers of all kinds and outcomes. Like the snake, bacteria **is** difficult to see, difficult to control but **is** a necessary component to life.

The staff and snake has long been the agreed symbol of medicine for many years. Taming the **s**erpent to give us that extra bit of valued time here on Earth.

TANGO

Scarab/Top of Skull

Re-Birth/Mind

The twentieth letter in the English alphabet shown **is** a **st**yled T shape section that sits on our top of most. The juice of the sun giving us energy and will.

The ancient Egyptians observed this wonderful insect very closely. As it collects the dung and tirelessly rolls it across the fields and sand just like the Sun rolling across the sky. From the ball new life emerges as larvae. The mummy wrapping system **is** mimicking this hatchling, so preparing the deceased for their re-birth in the DUAT

Along with the agricultural waste material, dung was collected frequently and brought to the Step Pyramid at Saqqara and when mixed with water created a slurry. This was then fed into a large chamber **s**erving as a bio-digestor. The amoebic bacteria consume this and in-turn produced methane gas which was carefully stored and also fed to the next pyramid in the sequence.... **STORE HIGH IN TRANSIT!!!**

A **s**uperior species, no doubt 

UNIFORM

Magnet

To Join/Seperate/Universal

The twenty first letter in the English alphabet shown is a magnet giving us a sense of joining/bonding but also implying a **s**eperation.

Magnetism is very much a universal concept as it **is** the fundamental basis that keeps everything together.

On a MOLECULAR principle it **is** the glue of life, the bonding substance that keeps us unified through life's strange, ever winding path.

Positive and negative Poles **s** attract, however they can also be a force that has an opposite effect, to repel, like TRUTH **vs** tyranny.

How can we drift so far apart if we're all in the **s**ame

The twenty second letter in the English alphabet represented as two fingers. With it's duality it **is** a world renown jesture of peace or an insult.

PEACE is a concept and outcome that all living sentient creatures would strive to achieve, we naivley suppose. However in our world as it has been demonstrated quite clearly, there seems to always be a flip-**s**ide.

PEACE is desirable, but we are hungry, we must consume and SURVIVE. We sometimes want more than our fair **s**hare and at some point we upset others and ourselves as a consequence. Unintentionally or with the deepest **s**ense of malignant evil we are very swift to curse, to vent, to aggressively express our displeasement or getting one over on our perceived enemy.

Sometimes however, the enemy begins from within
●NE**S**ELF

Peace is achievable. GR**A**TITUDE **is** one branch on the olive tree.

WHISKEY
Water/Spirit
Flowing/Life Force/Life Giving

The twenty third letter in the English alphabet clearly showing flowing water. To the ancient Egyptians and many other creatures, water **is** the essence of life. They built their entire civilization around it and with it. They harnessed its superior force to raise, to build up and provide and sustain life.

The pyramids were constructed using the river Nile as the key component to transport and manoeuvre the stone blocks into place to create this magnum opus of a jigsaw puzzle, and it still puzzles us even though the answers are in plain sight.

Those who have indulged know that the spirit, that **is** distilled alcohol has a profound re-juvenating effect on the mind and body. Like a river, or a loch, or indeed the sea into which it flows, can be very exciting and also

DANGEROUS

Measure it out carefully, drink it up. and raise your SPIRIT if you DARE to.

X-RAY

Cross

Place/Marker/Warning/Welcome

The twenty fourth letter in the English alphabet **is** the very common symbol of the CROSS. A direct example of how just two lines can enclose so much meaning and information and has been a great subject of debate for a very long time.

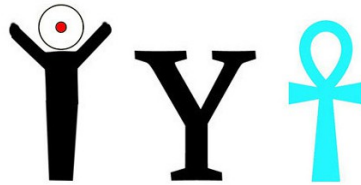

It's two converging lines creating a centre point immediately draws **s** our mind in and calls us to take notice of it.

The X-ray machine allows us to INVESTIGATE and get a better picture of what is happening. Like a HAWK soaring above in the SKY that has a spectacular ariel view is able to pin-point it's target and make a decision.

It is therefore no surprise **Y** it **is** used as a very useful warning **s**ign, and also seeing as it always gets our attention contains something very rich, something very deep.

marks the spot.

YANKEY
Arms Outstretched
Joy/Key of Life/Ankh

The twenty fifth letter of the English alphabet **is** the key of life, the Egyptian Ankh. Like the previous standard cross it contains much information. Remember it's our nature to **ask**

WHY

When we are happy, inspired, driven, ignited and when everything seems to lock into place we are flooded with extraordinary sensations, feelings and actions **s** that culminate in the beautiful chemical reaction that **is** sometimes called

JOY

When I have felt this, like so many others I have raised my arms to the sky, to the Sun, to the Moon in heart-felt gratitude for the miracle that **is** life, to breathe, to exist and to experience. Raise a measure to that. BRAVO!

Once you have found your **Y**

You can with**s**tand any **Y**ow.

The twenty sixth and final letter of the English ALPHABET **is** shown as three strokes traversing creating the symbol we use alot to depict sleep.

Like any journey, things are rarely straightforward. Life throws as many obstacles **s** in our way as it can to keep us guessing, questioning and re-po**s**itioning ourselves because arrows are always being fired from the bow. It's how we grow and develop and we all need a good surprise**s**.

NOW and THE 

But when the day is done, the work **is** never completed. We rise again to confront a new day, a new challenge and a new call into BEING

Such a vital ingredient in the cook book of existence. We must learn to rest so we can prepare ourselves for another day on our quest. So we don't become troubled by unnecessary things that weigh us down.

RE**S**T WELL XX**x**

There is an ancient Egyptian story that goes...

Osiris who was and always will be the deity, the great king and shepherd who taught his people the laws of nature (MAAT) and cared for them with all his heart, ruled over the two lands and created a true golden age. Hiding in the darkness out of sight and mind was his evil brother Set who was exceedingly jealous of the great king's achievements and secretly plotted his brother's demise so that he could seize the kingdom and become the new ruler.

After a time Set and his followers finally strike when the king was tired and weak and trapped him inside a coffin suffocating him. His body was then removed and cut up into several pieces and scattered across the two lands of his beloved kingdom.

Isis the eternal great mother, master of all the magic arts and wife/sister of Osiris set out on a quest to find all the pieces of her husband and bring him back. With some help, find them she did, however in order to resurrect Osiris long enough to ensure she would bear their child who would become the next king, restore order and carry on his father's great spirit, she would require the ultimate magic spell.

The greatest spell or word of ultimate power in the known realm of creation was the secret personal name of the sun ray god Ra. Every single thing to exist was named by Ra and every force of nature/ntr had a personal secret name that if one attained could then call upon that force to assist them in both realms of being (Duat).

Ra resides in a special solar boat travelling across the sky on it's fixed course. He is at his most powerful at midday.

Isis used all her magical abilities and detailed knowledge of nature to craft a cobra snake that carried the most deadly poison known. Then, transforming herself into the sacred owl, she flew up to the stars and carefully laid the cobra on the path of the soon approaching solar boat of Ra.

The cobra presently strikes the rays of Ra, biting him and delivering the perilous payload. Ra screamed out in total silence and in dire agony, he could not fathom what had happened to him and called on all the powers of nature to come to his aid quickly. None possessed the correct words and so he was left helpless and his light was fading fast.

As the land was approaching total darkness Isis appeared before Ra. She explained that the only possible antidote would be that Ra pass his secret name onto her and she would be able to create a spell to vanquish the poison from him. After an initial refusal Ra agrees and gives up his secret name to her and she graciously frees him from almost certain death...

Ra recovers and after thanking Isis for saving him, he carries on his daily journey to the western horizon to rest in the underworld, ready to begin again in the east.

Isis is reunited briefly with her loving husband and manages to successfully conceive a child and gives birth to a son and names him Horus. She passes the secret name of Ra into Horus, along with all her other magical knowledge and abilities thus ensuring the spectacular defeat of Set who is then banished to the desert. Horus restores his father's kingdom to its true glory and Osiris now becomes the eternal king of the DUAT...

Words are indeed magic dear reader, hence why we have the word 'spelling'. Words are extremely powerful and DO have consequences. Each 'letter', as I have shown you, is a word/meaning all on it's own. A special cipher that ancient humans have been using to distill the most precious knowledge of nature, the mind and indeed LIFE. Some letters do seem to hold a very special kind of power and a great deal of effort has been made to preserve and cherish the wisdom enclosed.

Words, like numbers are just like a game.

ANAGRAM

ACRONYM

The game has been playing out for a long time. But all games must finally come to an end...

SO

In this beautiful story we have alot of information concealed. One might say this is a distillation of LIFE itself, or the HERO's journey. YOU are that hero dear reader. Really.

SO The great Mother

ISis/Hathor/Ast/Iesus IS the MOOn.

RA is the light from the SUN (C
ro
i
s)

EL is 'The NAME'

So if the Moon managed to take the light of the Sun for the sake of attaining the secret name to restore order and truth, what WOULD that LOOK

like?????????????????????????????????????
